Partner and not a supervisor

Kuwait Oil Tanker Company is keen to deal with the Audit Bureau as an essential partner and not a supervisor, so they consider their remarks regarding the company's performance to be particularly important and is working hard to quickly answer their questions and inquiries and work to avoid criticism and improve the performance to achieve the best interest of everyone.

The relationship between the company and the Audit Bureau is based on mutual respect and keenness for the public interest of the nation. This is evident through the meetings between company officials and the Audit Bureau, where they are praising the cooperation of the company with the Bureau regarding the recommendations reached and the follow-up mechanism. This is reflected positively on the efficiency and effectiveness performance of the company.

The company also enjoys the confidence of the Audit Bureau, and we have got the first place in the assessment of the performance of the oil companies over several years in a row. We were selected based on the accuracy of the performance and speed in the delivery of the final accounts. We take into consideration the recommendations mentioned in the Audit Bureau reports, and work to fix the problems and take the necessary steps to avoid them.

I would like to point out here that some organizations abroad use specialized advisory companies to correct its course and find out shortcomings in exchange for huge sums of money spent in this aspect, while the State Audit Bureau of Kuwait play this role in the required manner, through the observations they make in order to adjust technical and administrative policies.

In conclusion I would like to emphasize that the Kuwait Oil Tanker Company is keen on cooperating with various state institutions and meet all their demands out of a belief that all of us are on the same ship trying to take it forward. May Allah Almighty help us to reach the best for our beloved country.

World Maritime Standards Organization grants the company two awards "KOTC" is the best operator in the Middle East, Sheikh Talal Al-Khaled "Person of the Year"

World Organization: the company has succeeded in running its fleet efficiently and provided the latest technology and trained national staff

Sheikh Talal Al-Khaled: We are proud of the achievements and we will continue to raise the name of Kuwait high in international forums

A new achievement for Kuwait Oil Tanker Company was winning the award for best tankers operator in the maritime industry on the regional level, the Middle East and the Indian sub-continent, and the granting of its chief executive Sheikh Talal Al-Khaled Al-Sabah the title of Person of the Year by World Maritime Standards Organization.

According to the merits of the award it has been obtained by the company for its success in running its fleet with high efficiency and provide carriers with the latest technical and operational techniques and equipment in addition to the provision of highly efficient and trained national staff to carry out the operations of the fleet around the world successfully.

■ Sheikh Talal Al Khaled receives the prize of Person of The Year

■ Sheikh Talal Al Khaled receives the prize for the best tankers' operator in maritime industry

Sheikh Talal Al-Khaled, chief executive, obtained the title of Person of the Year in recognition of his achievements in the field of maritime industry, and his success in raising the status of the company regionally and globally in

addition to his motivational efforts as a leading and his contribution to enhancing the company's capabilities by providing its fleet with the latest standards of global marine technology.

The merits of Sheikh Talal Al-

Khaled's title, according to the World Maritime Standards Organization, confirmed that those stimulus efforts raised the company's performance level, including them in the ranks of major companies in the field of maritime transport based on high expertise stemming from assuming several leadership positions in the Kuwait Petroleum Corporation and its subsidiaries.

Sheikh Talal Al-Khaled was honored in the celebration which was held by World Maritime Standards Organization in Dubai, in the presence of chief executives, chairmen and members of boards of directors of shipping companies in the Middle East and the Indian sub-continent. The senior management of the organization

■ Sheikh Talal Al Khaled, Mr. Ali Shehab, Captain Yousef Al-Saqer and Engineer Yousef Al-Khamis

granted the company the best carriers' operator in the maritime industry award on the regional level in the Middle East and the Indian sub-continent. Sheikh Talal Al-Khaled Al-Sabah was also awarded with the title of Person of the Year in the field of maritime transport industry

The prize and title came as culmination of the efforts of the Kuwait Oil Tanker Company and its employees, and this achievement is added to the successes achieved in the field of maritime transport, which in turn is a significant milestone for Kuwait Petroleum Corporation and its subsidiaries.

It is worth mentioning that this award is supported and certified by the Federal Transit Authority "FTA" where Maritime Standards Organization aims to highlight the achievements of the companies and people in the regional shipping industry. There are global maritime organizations support this award on the regional level, and they are Baltic Council and the International Maritime and Shipping Federation of the UAE, the Council of Dubai International Marine Industries, and the Federation of Dubai Shipping Agents, in addition to the Organization of the Islamic Union of Ship owners.

On his part, Sheikh Talal Al-Khaled expressed his delight at the company obtaining this global grand prize, stressing his

To show the appreciation of the oil sector to the company's achievements

KPC honored Sheikh Talal Al Khaled

In a gesture that reflected the great appreciation of the oil sector to the great achievements of KOTC, Mr. Nizar Al Adsani, CEO of KPC, honored Sheikh Talal Khaled Al Ahmed Al Sabah, CEO of KOTC.

This comes as a result of World Marine Standards Organization choosing Mr. Talal Al Khaled as person of the year, in addition to granting KOTC the best tankers operator prize in the maritime industry in The Middle East and Indian Subcontinent.

During his meeting with Sheikh Talal Al Khaled, Mr. Nizar Al Adsani praised KOTC's achievements that made it highly ranked among the largest country in the marine transportation field, on both regional and international levels. He also stressed that this achievement is counted for Kuwaiti oil sector.

■ Mr. Nizar Al Adsani rewarding Sheikh Talal Al Khaled

commitment and determination on going forward in raising the level of the company to provide global services on record levels, in order to keep it in competition with major international companies in the shipping industry. Sheikh Talal Al-Khaled pointed out the keenness of the company

and its staff to raise the name of Kuwait high in international forums, stressing his continual encouragement in order for these achievements to happen with the efforts of national staff and workers who have become experienced and ambition in an admirable way

A delegation from KPC inspects the LPG filling branch in "Umm Al-Aish"

■ Mr. Nizar Al Adsani and Sheikh Talal Al Khaled listening to explanation from the control room

■ Sheikh Talal Al Khaled talking to Engineer Yousef Al-Khamis

Mr. Nizar Al-Adsani, Chief Executive of KPC, accompanied by Mr. Mohammed AlFarhoud, the elected member for planning, Mr. Bader AlSharad, the elected member for administrative affairs, Mrs. Wafaa AlZaabi, deputy of elected member for planning, and Mr. Mosaid AlSalman, Head of Petroleum Leakage Team performed an inspection visit to LPG filling branch in "Umm Al-Aish", where they were received by Sheikh Talal Khaled Al Ahmed Al Sabah, CEO of KOTC and a number of managers and team

leaders.

During the visit, KPC delegation reviewed to a presentation by Engineer Mohammed Al Badah, Manager of LPG filling branch in "Umm Al-Aish", about the difficulties that the team faced during the implementation of the project and how they overcame them reaching the operational tests and then the experimental production in February 2015, as its market share reached 6% of the local demand for gas cylinders. The production continued to grow until it reached 16% in March

2015, and kept growing until it reached 65% last September.

Engineer Ahmed Al Badah confirmed that all production operations in LPG filling branch in "Umm Al-Aish" fulfill the international security and safety requirements, confirming that the plant meets the latest standards in LPG filling field, as it is equipped with the latest safety operating technology "SIL3", and its equipments are tested to meet the standards of Public Environmental Authority, pointing out to the strict security measurements aiming at preserving this vital establishment.

Engineer Ahmed Al Badah pointed out that the new plant is equipped with the latest LPG cylinder filling technology as it is controlled by "FLEX SPEED" technology, which helps controlling the production capacity of the plant

■ Getting ready for a tour in Liquefied Gas Filling branch Um Al Aish

■ Security officials in a memorial photo

■ A tour in the control room

■ Memorial photo of other employees

■ Mr. Raed Al Majed and Mr. Nasser Al-Qattan

Engineer Ahmed Al Badah explained that the maximum production capacity for the new plant is 7200 cylinder per hour, and can provide 15 million cylinders per year. This is equal to 160% of the capacity of LPG filling plant in Shuaiba, in addition to the fact that the plant doubles the period of strategic storage of LPG to more than 50 days, with more than 6 thousand tons of LPG. After the demonstration, Sheikh Talal Al Khaled led Mr. Nizar Al Adsani and his companions in an inspection tour of the buildings and facilities of LPG filling plant in "Umm Al-Aish", where they were shown the production lines and how they are inspected before and after filling to guarantee safety and quality before reaching the consumers. They also inspected the control rooms and the security and safety procedures followed in the plant in addition to the production and distribution lines that provide different sizes of cylinders for customers from both public and private sectors.

by increasing or lowering the speed of the production center, which can provide the needs of Kuwait until the year 2030. The storage in the new plant is done

through buried tanks. There are 6 tanks with a storage capacity of 2350 cubic meter per tank, and this is considered the safest storage method worldwide.

Held by Kuwait Petroleum Corporation in the oasis of Subaihiya at Burgan field KOTC participated in the environment day festival and the memory of last oil wells extinguishing

Nizar Al-Adsani: The experience of extinguishing the burning wells in Kuwait has been a strong motive for the development of dealing with crises mechanisms

We are keen to consolidate the concepts of security, safety, health and environment in the oil sector to become a culture, not a slogan

In the presence of Chief Executive Officer of Kuwait Petroleum Corporation, Mr. Nizar Al-Adsani and Sheikh Talal Al-Khaled Al-Ahmad Al-Sabah, CEO of KOTC and the participation of chief executives in the oil companies and a crowd of officials in the oil sector as well as the ambassadors of several countries in the state of Kuwait Petroleum Corporation and its subsidiaries celebrated the Environmental Day and the anniversary of extinguishing the last oil well in the oasis of Subaihiya in Burgan field.

■ Mr. Nizar Al Adsani, Sheikh Talal Al Khaled with VIP guests while playing the National Anthem

Celebration started with a speech by Mr. Nizar Al-Adsani, who expressed his happiness to participate in the celebration of the Environmental Day and the anniversary of extinguishing the last oil well, pointing out that this anniversary marked a new phase in the history of modern Kuwait, after Kuwait managed, with the efforts and sacrifices of its loyal citizens and the help of friendly countries, to control the largest environmental disaster in history, when the brutal Saddam's forces burned more than 700 oil wells, stressing that the disaster of burning Kuwaiti oil wells is a clear evidence of the devastating effects of war on the environment and living organisms.

Mr. Nizar Al-Adsani explained that burning oil wells had serious health

effects on the people who live in Kuwait through the pollution of air and water, pointing out that the effects of burning wells extended to groundwater of Kuwait, which is already rare.

Mr. Nizar Al-Adsani said that the amortization of burning wells took eight months and that period of time shattered the expectations which was referring to longer time periods with larger financial and human cost recalling the deeds of His Highness the late Amir Sheikh Jaber Al-Ahmad Al-Jaber Al-Sabah, may Allah bless his soul, who participated in the celebration of putting off the last burning well in Kuwait on the sixth of November 1991.

Mr. Nizar Al-Adsani explained that the experience of extinguishing the burning wells in Kuwait

was a strong motive for the development of initiatives and mechanisms to confront the crisis and be prepared to deal with any emergency or disaster threatening the environment with professional, organized and well thought out standards, within the team spirit, stressing the desire of the State of Kuwait and the Kuwait Petroleum Corporation and its subsidiaries to consolidate the concepts of security, safety, health and the environment and that these concepts should become cultural and moral values, not just slogans.

At the end of his speech, Mr. Nizar Al-Adsani thanked all the honest people who sacrificed in order to preserve the wealth of Kuwait, and the friends who have contributed in extinguishing burning oil wells, stressing that Kuwait is working hard to strengthen its international role in the security of energy supply in accordance to a long-term plan aimed at raising production capacity and production of clean products .

In turn, CEO of KOC Mr. Hashim Hashim, welcomed the audience, recalling the difficult times experienced by the State of

■ Mr. Nizar Al Adsani, Sheikh Talal Al Khaled and Mr. Bader Al Sharrad

■ Number of the participants

■ Sheikh Talal Al Khaled in a side talk with Mr. Mohammed Al Farhoud and Mr. Asaad Al-Saad

■ One of preparatory meetings that were held in the company

Kuwait and the oil sector when the invading forces blew up 727 Kuwaiti oil wells, which has led to an unprecedented environmental disaster that resulted in the burning of six million barrels of oil per day .

Mr. Hashim Hashim pointed out that this environmental disaster led to a significant decrease in local temperatures reached 10 degrees, accompanied by notable climatic changes, after the day of

Kuwait turned to night as the sky was overshadowed by black heavy clouds with poisonous gases, in addition to smoke that spread to about 2,000 kilometers, until it reached the borders of both China and India, while the resulting ash reached Japan and the islands of Hawaii.

Mr. Hashim Hashim pointed out that Kuwait has made great efforts to overcome this disaster, and that the end of the month of August

1991 witnessed the presence of 11 companies specialized in extinguishing oil fires, to work in the region. There were teams representing three continents and came from Kuwait, Canada and France, Hungary, Romania, Russia, United Kingdom, China, Iran, Argentina and the United States of America .

The celebration program included a presentation of a documentary film about the efforts of the international companies that took part in extinguishing the oil wells, focusing on the Kuwaiti team that surprised the world with its ability to deal with this huge environmental disaster.

At the end of the ceremony, the CEO of Kuwait Petroleum Corporation honored Kuwaiti firefighters' team, and then he escorted the guests on a tour in the Oasis of Subaihiya to see the achievements of the institution and Kuwait Oil Company in the field of preserving the environment.

It is worth mentioning that KOTC participated in preparing for this event over the period of 3 months, as it hosted a number of preparatory meetings, in the presence of Engineer Jihan Al Hubaishi, Head of QAHSSE of the administrative building.

In order to check on them, listen to their demands, and motivate them to success, representatives of the company visit marine students who are on scholarships in the United Kingdom

Hisham AlRifaie to the students: You are the future of the company, so be the best representatives of both the company and Kuwait

As the company is always keen to support the students who are on scholarships, Mr. Hisham AlRifaie, head of human resources and professional development and member of scholarships committee, Mr. Asaad AlManie, supervisor of fleet staff affairs, and Mrs. Hadeel AlMatar, fleet staff training analyzer, visited the scholarships students who study in Oxford and Cambridge in the United Kingdom, to

check on them, motivate them and listen to their opinions and demands.

During the visit, Mr. Hisham AlRifaie assured the students that the company gives them special attention and is keen to develop their skills and provide their needs, as they are the future of the company. He also demanded the students to give more effort and concentrate on their studies to be the best representatives for their country,

wishing them success in their studies and practical lives.

The company representatives met the officials of the colleges of the students, and listened to explanation about the subjects they study, and the educational and training programs they take. They praised the attitude of the students and their cooperation. They praised their ability to study and confirmed that they are on the right path to success.

A team from Kuwaiti National Petroleum made an Assessment of the indoor air quality for company 's building and the Marine Agency Branch

■ Engineer Nawaf Al Zaabi, Engineer Jihan Al Hubaishi, Mr. Rafi Raw with KNPC team

Based on request from KOTC, a baseline Indoor Environment Quality (IEQ) study was carried out at KOTC Head Office Building and Marine Agency Branch (MAB) & by KNPC, HSE-Department, Technical Support-Industrial Hygiene Group. The study was conducted in August 2015 at HO and in October 2015 at MAB.

This study covers identifying major Indoor Environmental Quality issues, which could affect comfort and wellbeing of occupants in line with K-EPA and best international practices. Interview of occupants, measurements of major pollutants, walkthrough survey,

and study of HVAC system and its impact on Indoor Environment quality were the salient features of the study. This study covers measuring different parameters like (a) Temperature, Relative Humidity, Carbon dioxide, Carbon monoxide, Dust, Volatile Organic Compounds, Noise and Illumination. (b) Visual inspection for other indoor environment quality parameters such as Mold, Airborne fungi, Odor, Paint, water seepage. The scope also includes collecting feedback from building occupants to assess comfort level including HVAC parameters.

Measurements were carried out in all nine floors of the building including 337 locations. 163 occupants participated in this survey by providing feedback forms at HO while in MAB all the office spaces and 78 occupants participated. Data collected were evaluated for compliance to K-EPA and international best practices.

REPORT

News from LPG Filling Branch "Shuaiba"
Supervision By of Engineer Khaled Al-Mahanna

The maintains department's task is to maintain the efficiency of the equipment and minimize malfunctions **Khaled Al-Mahanna :LPG Plant "Shuaiba" has done several vital projects this year**

Field work is marked by seriousness, experimenting, team spirit and the renovation of tasks and ideas

Training courses participates greatly in forming workers' personality and developing their skills

Engineer Khaled Al-Mahanna, chief maintenance engineer at liquefied gas filling branch in Shuaiba that some of the duties of the maintenance department are to maintain the efficiency of the equipment and minimize malfunctions. He pointed out that many projects have been done during the past period, and that there are other projects that are being carried out in order to achieve significant development in the plant.

Engineer Khaled Al-Mahanna stressed, in his interview with the magazine, the importance of training courses that employees participate in, both in Kuwait and abroad, as they develop their skills and abilities and give them more experience. He also praised the productive cooperation among the workers and that serves the work.

At the beginning tell us about your studies and how you joined the company.

I graduated from Faculty of Engineering and Petroleum, Kuwait University Department of Mechanical Engineering, and I joined KOTC in 2003.

What is your job at liquefied gas filling plant in Shuaiba?

Chief maintenance engineer, and responsible for the maintenance department, that consists of four workshops, general maintenance, repair and welding, automotive and electricity. Our main task is to maintain the efficiency of the equipment and minimize malfunctions by applying preventive maintenance of the equipments, in addition to installing and operating new equipments that are added to the production lines in the plant.

What are the advantages of the maintenance department in the plant?

The maintenance department has a distinguished group of engineers and technicians who are long experienced in the field of manufacturing and filling liquefied gas, and they are ready to work under any conditions, no matter how hard they are, in order to maintain the operating of production lines in a satisfying way.

What are the most important projects that you are working on at the moment?

There are several projects like installing 3 cage stacking units, and this project was completed in September, in addition to installing

electricity generating solar panels, installing 2 emergency electricity generators. This project is expected to be finished by next May. There is also inspecting and fixing the main gas pipeline in cooperation with KNPC and installing a cage stacking unit in the special center in addition to other projects aimed at developing the plant.

How do you find the cooperation among the company's employees?

The work at liquefied gas filling branch is characterized by cooperation, exchanging experiences through the team spirit prevailing in the plant.

What is the difference between field work and administrative work in the plant?

Field work is marked by seriousness, experimenting, team spirit and the renovation of tasks and ideas in response to the difficulties faced by field workers, while the administrative work is marked by routine and following up on documents.

What is the role of training courses in developing employees' skills?

They greatly participate in developing workers' personalities, especially the courses aimed at developing personal skills, and the specialized technical courses, the thing that

■ Engineer Khaled Al-Mahanna

reflects positively on the workers' performance which in turn benefits the company.

What are the most important characteristics of KOTC employees?

There are several characteristics that distinguish the company's employees like the sense of belonging, cooperation, respect for fellow workers and having experience and efficiency in the company's work field.

What are your suggestions to improve the work?

Taking care of the human resources through having more training courses and being fully aware of the latest technological developments and

being up to date in the oil and gas industry.

What are your aspirations for the future?

To have the blessing of Allah in this world and the next, and to be successful in my personal and professional life.

What is your message to your fellow workers?

To be hard working and honest in performing their duties, and to have relationships based on love and respect.

■ With number of Liquefied Gas Filling branch engineers in Shuaiba while visiting a gas plant in France

Supply, install and commissioning of (5) Units Capping Machines (shrink type) for PFC and filling centers plus removing the existing (5) Units Capping Machines

Kuwait oil tanker Company LPG filling branch SHUAIBA has been carried out new project by installing and commissioning new machineries (5 Units Shrink Caps Machine).

The aim from this project is to increase the reliability and quality of the product where the supplier is one of the leaders of the LPG in the overseas.

SIRAGA SA - France is specialized more than 40 years in LPG industry. Since, the French company provides consultations and engineering studies moreover it designs and manufacture all LPG equipment's with applying high standard European and American standard (API, NFPA, DOT...etc.).

KOTC goal by implementing this project is to grantee and

ensure LPG cylinders are delivered to the consumer with high quality and commercial assurance.

KOTC takes the priority to inaugurate high standard equipment to be complied with the latest technology in the LPG market in order to stay in high ranks in LPG felid.

SIRAGA SA - France

has designed the shrink caps machines with production capacity 1600 Cyl./Hr. the machines works fully automatic via pneumatic clamps to center and place the shrink caps vertically on top of the LPG valve upon passing the LPG cylinder underneath the heater blower to shrink the cap.

The characteristic of the shrink cap is easy to be peeled out by the consumer were it designed with high standard to be formed on the valve homogeneously after the shrink process.

In addition the advantage of the shrink cap is to identify the source of the cylinder which means north or south plant plus the filling center number and the benefits of this the cylinder can be tracked in case if there is any defect of leakage.

During a seminar the company held in cooperation with leaders' development center to evaluate K-Lead program

The group of human resources and professional development, in cooperation with leaders' development center in KNPC, held a seminar to review K-Lead program with group managers in KOTC, in order to listen to their evaluation of the program. The managers had many opinions and

suggestions for the representatives of leaders' development center that will contribute in developing the program in the near future. Leaders' development center started K-Lead program last year according to international standards to develop training efficiency of the company's and

its subsidiaries' leaderships, according to the set strategies, to provide the participants with a chance to develop their leading, practical and organizational experiences and to put an organized framework to manage the work in a clear and developed way.

■ Engineer Yousef Al Khamis talking about k-lead program

■ Number of the seminar participants

Seminar to discuss how to implement the Unified competencies system in the oil sector

As part of the efforts to standardize the procedures in the oil sector, a group of human resources and career development organized, in coordination with the Information & Communication Technology Group, a workshop for members of the Committee on Organizational Capability & Development OCD from the oil sector representatives, to present and explain the new application in the automated system to be implemented in the Kuwait Oil Tanker Company this year in line with the unification of the automated system to assess the competencies and the procedures for personal development plan in the oil sector.

The company discussed the developments of the Block Agreement of tankers drydocking and maintenance signed with ASRY – Bahrain

Chief Engineer Mr. Bader Al-Otaibi, Manager of the Fleet Engineering Group, met with Mr. Magdy El Sharkawy General Manager Commercial Affairs in ASRY, and they discussed the mutual co-operation and the latest updates about the agreement signed between KOTC and ASRY.

The two sides discussed the latest development in ship building and repairing industry worldwide, and the most important projects supervised by ASRY, and the services it provides in the fields of ship repair, marine services, consulting, and energy, in addition to the possibility of starting new channels of cooperation with KOTC in the future.

The meeting was held in the presence of Chief Engineer – Mr. Emad Naser, Team Leader Fleet Engineering A and Chief Engineer – Mr. Wahid Al Qallaf, Team Leader Fleet

■ Chief Engineer Bader Al Otaibi between Engineer Wahid Al Qallaf, Chief Engineer Emad Naser and Mr. Magdy El Sharkawy

■ Part of the meeting

Engineering C.
It is worth mentioning that last February the company signed an exclusive agreement to maintain 19 tankers over 3

years, which is the largest agreement of its kind in GCC, and it allows KOTC to maintain its tankers on regular basis in the yards of ASRY in Bahrain.
