Different stage

In the beginning of my speech, I am glad to welcome you all, and I hope that the period of our work together will be full of achievements that we are used to from the Kuwait Oil Tanker Company.

During these days we are ending year 2022 and welcoming a new year. On this occasion, we extend our warmest congratulations to His Highness the Amir of the Kuwait, His Highness the faithful Crown Prince, His Highness the Prime Minister - may God protect and preserve them all - and the honorable Kuwaiti people, and all my brothers and sisters working in the Kuwait Oil Tanker Company and we hope from

God Almighty that the year 2023 will be a year of goodness, security and stability, and that will bring with it goodness and progress for our beloved country, Kuwait.

The previous stage was completely different than other stages that we have gone through, especially with regard to the health challenges represented by the “Corona” pandemic that struck the whole world, and its effects and changes that affected most aspects of our lives, which prompted the company’s employees to redouble efforts to remain a company “Kuwaiti Oil Tankers” carries out its important, vital, and basic responsibilities for the Kuwaiti economy and society, so the company maintained the continuity of its operations in transporting Kuwaiti oil and petroleum products, and meeting the local market’s need for liquefied petroleum gas cylinders, as well as the needs of local industrial sector companies liquefied petroleum gas.

The company has also succeeded in modernizing and developing its giant fleet through the last 8 tankers that were built at the highest levels of technology to keep pace with international standards, considering the preservation of the environment, and the company now owns 31 tankers, all of which operate with the highest operational efficiency and conform to international treaties.

The company is also an development and a factory that supplies the State of Kuwait with highly qualified and experienced national cadres working in the maritime field. From this standpoint, a memorandum of understanding was signed between the Kuwait Oil Tankers Company and the Kuwait Oil Company, according to which the Kuwait Oil Company benefits from the expertise of the Kuwait Oil Tanker Company in external scholarships to study marine specialties, in a way that contributes to the development of the relationship between the two companies. Within the framework of the unified strategy for the oil sector to invest in the human element, in a way that serves Kuwaiti youth.

I would also like to commend all the employees for their hard work to maintain the level of the company to be among the international companies, which reflects the high national spirit of serving Kuwait.

In conclusion, we hope, with the beginning of 2023, to continue achieving our achievements and reach the world by working as one team, praying to God Almighty to help us serve Kuwait and protect it from all harm.

Kuwait Oil tankers won the (Maritime Education and Training) Award for the year 2022 in the maritime industry in the Middle East and the Indian subcontinent

Group Picture

The Kuwait Oil Tanker Company won the (Maritime Education and Training) award for the year 2022 in the maritime industry in the Middle East and the Indian subcontinent, which is granted by the International Maritime Standards Organization. The (tankers) stressed

that winning the award at the ceremony that was held recently in Dubai was the culmination of its efforts and its employees, noting that qualifying the skills of the human element is a priority for them.

The Kuwait Oil Tanker Company was established in 1957 and is considered the first Gulf company specialized in the field of transporting oil and natural gas. It is a subsidiary of the Kuwait Petroleum Corporation. The International Maritime Standards Organization is considered one of the most important international bodies in evaluating the maritime industry, which is keen to distinguish companies with high performance, especially with regard to ship management, marine industries, and operation and maintenance of ships related to oil and gas transportation. The organization grants its awards based on the arbitration decision issued by an arbitration committee consisting of a group of international arbitrators specialized in the maritime transport industry and in accordance with international standards and criteria that made it one of the most important awards in this field.

During the period from October 31 to November 4, 2022 in Mumbai Fleet Operations Group organized a course and workshop for the SIRE 2.0 Maritime Inspection Program

Group Picture

The Fleet Operations Group organized a course and workshop for the SIRE 2.0 Maritime Inspection Program during the period from October 31 to November 4, 2022 in Mumbai, India, under the auspices of the Fleet Personnel Affairs Group, under the supervision and training of Captain Bader Al-Motairi, Head of the Fleet Operations Task Force (liquefied gas and oil derivatives).

Main Goal

The aim of the training course and workshop is to confirm the keenness of fleet operations for the continuity of full readiness for oil tankers and to prepare navigation and engineering officers to be ready to deal with the system and mechanism of the new inspection system and to cover the highest percentage of oil tanker employees in the fastest time.

The organization of this workshop came due to the need for it after reviewing the marine inspection report of the international organization OCIMF, where more than 180,000 combined ship inspection reports since 1993 were subject to study and audit, through which the level of performance at work and marine safety was improved, and the inspection program contributed to effectively reducing the rate of marine accidents of a simple or dangerous nature. And based on the results of the previous SIRE inspection program, new points were reached that require activation to raise the operational level and the level of security and safety related to marine operations, by focusing on the human element and developing it to cope with the upcoming challenges, which include activating environmental and energy laws and their consequent impact on the technical operation of ships .

Captain / Bader Al-Motairi

Requirements

It is worth noting that the SIRE 2.0 workshop was designed taking into account all the requirements related to it. The workshop started with an overview of the (SIRE 2.0) program, then shed light on the inspection process in detail, and ended with practical advice on dealing with audit inspectors. The seminar has been developed with the assistance of a SIRE Inspector and experienced office staff.

Side of the Seminar

Captain Bader Al-Motairi focused on four main areas to enhance human development that KOTC seeks: (Accuracy - Capability - Documentation - Adaptation).

Thank full

Captain Bader Al-Motairi expressed his thanks and appreciation to the Fleet Personnel Affairs Department of the Kuwait Oil Tanker Company for the wonderful task they have undertaken to organize such a distinguished seminar in Mumbai. A high level of involvement and motivation was noted by the Program Design Department in engaging the offshore crew in the SIRE 2.0 programme. The selection of the venue, and the venue arrangements were all in accordance with the standards of the Kuwaiti Transportation Tankers Company. Over the course of the three days, Captain Jaber Al-Ghawas and Captain Alan Xavier all contributed greatly to the success of the seminar through countless hours of preparation.

Strengthen

Captain Bader Al-Motairi emphasized that the new program will be enhanced by a more comprehensive inspection system with improved tools, enhanced governance processes and more in-depth reporting results, following a risk-based approach. So KOTC conducted a SWOT analysis between SIRE2.0 and KOTC IMS and now KOTC is in the phase of implementing change management. Enhanced inspection standards for equipment, procedures and human factors to further improve control over ship safety systems and processes Enhanced pre-inspection processes and more robust monitoring protocols will

Group Picture

be included in the inspection process KOTC will enhance KOTC self-inspection through a SWOT analysis for each chapter of the SIRE2 .0. An enhanced governance process to provide greater transparency and oversight to all parties involved in the program, whether directly or indirectly, and the adoption of enforceable and verified rules by KOTC. Significant improvements to the ongoing training and development of all personnel at the management and operational level who serve aboard oil tankers and gas carriers to ensure that the highest level of delivery is maintained and improved.

Knowledge

He added that the objective of the workshop achieved its desired objectives, which are represented in the knowledge of the tanker staff of the SIRE 2.0 program and the TMSA standards for tanker operators, the understanding and comprehension of the maritime work team to understand the difference in the methodology for examining inspections under the maritime SIRE 2. Understanding the inspection process and the main success factors for undergoing inspections and audits Successfully, I helped Al Bahr staff to be able to interact appropriately with audit inspectors and follow up on observations satisfactorily and healthy discussions were in depth during the course of the workshop. Experience was shared openly and constructively.

To view all matters related to the factory and all developments The gas filling branch (Shuaiba) organized a public health and occupational safety day

The Liquefied Gas Filling Branch (Shuaiba), Department of Health, Safety, Environment and Engineering Department, in cooperation with Kuwait Oil Company Hospital, organized a day for occupational health and safety on the morning of Wednesday, November 9, 2022, in the administrative building of the factory in Shuaiba. This was in the presence of Eng. Ahmad Al-Bdah, Director of the Factory. On the occupational ergonomics, health and safety, and others related to nutrition, and competitions, and on the sidelines of the Occupational Health and Safety Day, the Kuwait Oil Hospital organized a campaign for winter vaccinations and Covid-19 refresher vaccinations at the factory. Manal Al-Shamri and Dr. Dhabia Al-Ajmi from Kuwait Oil Company Hospital, and nutritionist Aya Samara

Profile

Eng. Yousef Bader Alkharraz

❖ **Name:** Yousef Bader Al kharraz

❖ **Age:** 27 years old

❖ **what is your Academic specialization and university?**

BSc in Computer Engineering from California State University of Northridge.

❖ **What is the nature of your work in the company?**

Windows Server Engineer.

❖ **Is the nature of your work commensurate with your scientific specialization?**

Yes, I was able to combine my abilities in computer engineering especially programming with my nature of work. For example, I built couple of programming tools to automate couple of tasks.

❖ **Is working in the company commensurate with your interests and professional ambitions?**

Yes, undoubtedly, it is proportional to a large extent.

❖ **How were you appointed to the company?**

I submitted for the latest announcement issued by KNPC, and I was accepted after passing all the requirements.

❖ **What is your favorite hobby?**

Programming – Solving puzzles – Reading especially in my field – Designing 3D model

❖ **Can you coordinate between your work and the practice of your hobby?**

Yes, I can.

❖ **What are your ambitions at work?**

One of my ambitions is to educate employees programming because I think it will be dominant in the near future.

❖ **Do you have a vision to develop your capabilities in order to achieve your goals?**

Absolutely, I think insistency and discipline are the two keys to develop my capabilities. It is better to do little things in a long period of time than doing a big thing for a short time. At the end, I wish all the best for everyone.

- 1) Where is the inhabited house located?
- 2) Who is the prophet that the sun stopped for him?
- 3) Who is the companion raised between heaven and earth after his martyrdom?
- 4) Who is the female companion that Allah ordered Prophet Mohamed to marry her?
- 5) Who is the first thing people will be sued in Judgment day?
- 6) What is the first prayer performed by Prophet Mohamed?
- 7) How many years between Prophet Adam and Prophet Noah, peace be upon them?
- 8) When did the State of Kuwait nationalize the oil industry?
- 9) How many barrels of oil does Kuwait produce daily?
- 10) How much is the highest cost of a barrel oil in Kuwait now and in which field exactly?

All answers will be sent to the email of the public relations team at the following email: publicrelations@kotc.com.kw

Two prizes will be awarded to the first contestants who submit the correct answers.

Parliamentary question

The parliamentary question is a tool of parliamentary oversight and a way to track the government's activity and actions. It is considered one of the members rights. To ask about a specific matter or to clarify an unknown matter, or to direct attention to an issue, or to warn against a certain action, or to avert a danger that may be expected to occur, and the question must be directed to the Prime Minister or the Minister In issues in his ministry's work, and it should be written, clear and signed by the presenter, free of comment, or private opinions. It should be specialized in a general issue.

Article 99 of the constitution specified both sides of the parliamentary question, which showed that the two sides of the question have the right to interfere or speak, and restricted it to the questioner... who is a member of the National Assembly, and the one responsible... who is the prime minister or minister.

The parliamentary question will be no longer valid at the end of the membership of the member who submitted the question.

❖ **Sources:-**

❖ **Kuwaiti constitution.**

Letter of the Secretary-General of the Council of Ministers No. 1/110-6508 dated 20/7/2005, which includes the honorable Council of Ministers Resolution No. 733/fourth regarding the controls that must be adhered to when answering the parliamentary question.
