Future Leaders and Challenges

The maritime sector is undergoing rapid transformation, facing unprecedented challenges driven by economic shifts and technological advancements, alongside regional conflicts and geopolitical tensions that have affected the security of maritime routes, the movement of vessels, and global supply chains. The maritime transportation of oil and gas is also facing growing challenges, including volatility in energy markets, increasingly stringent environmental and regulatory requirements, the accelerating pace of digital transformation, and rising operating and insurance costs. At the same time, there is a pressing need to modernize fleets, strengthen cybersecurity, and enhance the capabilities of national talent. As these developments continue to increase, informed leadership capable of making strategic decisions has become a fundamental pillar of institutional resilience. Effective leadership is essential to ensuring business continuity, navigating emerging challenges, and shaping a more sustainable future for the maritime sector. This underscores the importance of developing specialized national maritime professionals equipped with the knowledge, experience, and leadership skills needed to lead the sector effectively and ensure its readiness for future developments.

In line with this strategic direction, the Company continues to invest in developing national talent through an integrated learning, development, and training framework aligned with leading global practices while expanding its specialized programs for maritime professionals. As part of these efforts, the Company is preparing to send a new batch of Kuwaiti students to pursue maritime studies at some of the United Kingdom's leading universities. The program aims to prepare a new generation of qualified marine officers and engineers through rigorous academic education and practical training based on the latest curricula and industry practices. This will equip them with the capabilities required to lead the sector effectively, meet the Company's future needs, enhance the competitiveness of Kuwait's maritime sector, and support the State's efforts to develop its human capital.

The strong interest in this year's maritime scholarship programs reflects the growing appeal of the maritime sector as a promising career path for young Kuwaitis. It also highlights the increasing interest in this vital field and demonstrates the success of the Company's efforts to promote its importance, enhance its attractiveness, and attract and develop national talent. These efforts are contributing to the preparation of a new generation of maritime leaders capable of driving continued development and leading the sector with confidence and competence.

The Company will continue to enhance its training programs and strengthen its partnerships with leading academic and maritime institutions to develop national leaders capable of navigating change, supporting the sustainability of the Company's operations, and further strengthening its contribution to the national economy.

We pray to Almighty Allah for continued success and guidance and ask Him to protect the State of Kuwait and its wise leadership and bless the country with lasting security, stability, and prosperity.

Yours sincerely,

Khalid Ahmad Al-Malek Al-Sabah
Acting Chief Executive Officer

A Healthy Summer Starts with Your Smile

(Awareness Lecture to Promote Oral and Dental Health)

Group photo

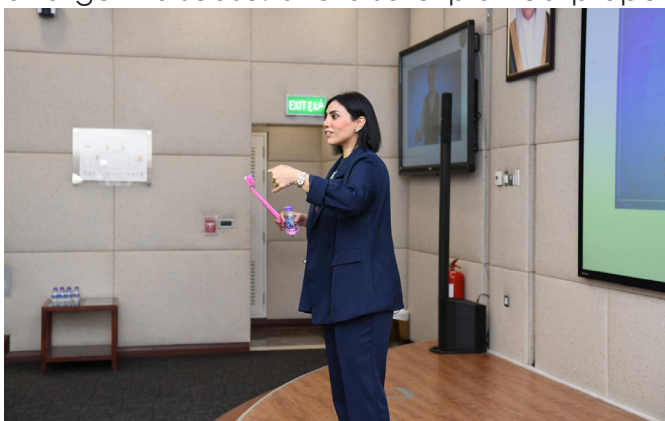

The PR and Administration Services Group, in the presence of the Group Manager Mr. Abdulrahman Al-Alyan, organized an awareness lecture titled "A Healthy Summer Starts with Your Smile" on Thursday, June 11, 2026, at the auditorium of the Company's Head Office. The lecture was delivered by Dr. Sheikha Al-Ajmi, a specialist in comprehensive dentistry, cosmetic and implant dentistry, and dental prosthetics.

Dr. Al-Ajmi highlighted the importance of maintaining good oral and dental health during the summer months, focusing on healthy habits that help prevent tooth decay and gum disease. She also explained proper

daily dental care practices and discussed the role of a balanced diet in maintaining good oral health.

Furthermore, she addressed some of the most common dental problems, their causes, and ways to prevent them, emphasizing the importance of regular dental check-ups for early detection of oral health problems and reducing the risk of complications.

At the end of the lecture, Dr. Al-Ajmi answered questions from the attendees and shared several practical tips and health recommendations to help promote greater awareness of oral health and maintain a healthy smile throughout the year.

The PR & Administration Services Group Organizes “Summer

Scenes from Exhibition

Part of its efforts to reinforce engagement with employees and provide them with added benefits, the PR & Administration Services Group, through its PR and Media Team, organized the “Summer Expo” on Tuesday and Wednesday, July 21–22, 2026. The event brought together 21 companies from a range of sectors.

The exhibition drew strong attendance and participation from employees, with participating companies offering a wide

selection of exclusive and special discounts on their products and services. These offerings catered to employees' diverse needs and added further value to the event.

The event concluded with prize draws, with valuable prizes presented to the winners in a vibrant atmosphere that reflected the success of the event. The initiative also underscored the Group's keenness to organize activities that enhance employee engagement and enrich the workplace environment.

And Organizes Mobile Phones and Accessories Expo

As part of its commitment to providing employees with a wide range of benefits and services, KOTC's PR and Administration Services Group organized the "Mobile Phones and Accessories Expo" on June 24 and 25, 2026, in the main lobby of the Company's Head Office.

The exhibition featured participation from Zain, Ooredoo, and STC, which showcased the

latest smartphones and accessories, along with special and exclusive offers and discounts for the Company employees.

The exhibition attracted good interest from employees, who took advantage of the offers and facilities available throughout the Expo, which contributed to achieving the objectives of organizing the Expo.

Captain Anwar Bouftain: KOTC Sets a Leading Example in Maritime Training and Scholarship Programs

- Investing in national maritime personnel is the foundation for a sustainable sector and the development of future leaders.
- Building a new generation of Kuwaiti maritime leaders to the highest international standards.

Captain Anwar Bouftain

The Manager of the Fleet Personnel Affairs Group at KOTC, Captain Anwar Bouftain, affirmed that the Company continues to play a leading role in developing and qualifying Kuwaiti maritime personnel. This commitment stems from KOTC's belief that investing in people is fundamental to the sustainability and continued advancement of the maritime sector. He explained that the Company has adopted an integrated strategy that combines academic scholarships, practical training, and partnerships with local and global educational and maritime institutions with the aim of developing a new generation of highly qualified national professionals in line with global standards while meeting the Company's future needs and supporting the

State's efforts to advance its Kuwaitization policy.

In an interview with "Nakilat" magazine, Captain Bouftain discussed the key features of KOTC's strategy for developing maritime talent, the scholarship and training programs, the student selection process, and mechanisms for monitoring their academic progress. He also highlighted the Company's partnerships with local and global entities and the results achieved in developing qualified national maritime personnel. He expressed his hope that these efforts would encourage more young Kuwaitis to pursue maritime disciplines, thereby contributing to the sustainability of the sector and supporting the development process in the State of Kuwait.

- **KOTC is preparing to send 20 students this year, with similar batches in the coming years.**
- **KOTC and KOC join forces to prepare 150 maritime students, with 30 sponsored students having graduated to date.**

To begin with, how does KOTC view the importance of investing in national maritime personnel, and what place does this file hold within the Company's strategy?

KOTC places the development and qualification of national personnel among its strategic priorities, believing that building human capabilities is one of the key factors in ensuring the sustainability and advancement of the maritime sector.

The Company operates according to a vision focused on developing a new generation of Kuwaiti professionals specializing in navigation and marine engineering, keeping pace with global developments in the maritime industry while helping meet the needs of the oil sector and the State as a whole.

With this in mind, KOTC has worked to establish an integrated system that begins with attracting students and providing them with academic and professional qualifications and continues through the ongoing development of their skills. This ensures the provision of maritime professionals with the competence and experience required to work in this vital field.

KOTC has earned a distinguished position in maritime training. Could you tell us about the Company's key training programs and the local and global entities you work with? What sets your experience apart and has enabled you to receive numerous excellence awards in this field?

The Company has established an integrated training system that combines academic education with hands-on experience, with the aim of preparing qualified maritime professionals who meet the requirements of the modern maritime industry.

The training programs include the academic preparation of students through specialized maritime institutions, in addition to occupational courses covering areas such as maritime security and safety, the handling of hazardous cargo, and practical training aboard oil and gas tankers.

At the global level, the Company cooperates with specialized maritime educational institutions in the United Kingdom. These cooperations have contributed to the development of our training programs and the enhancement of their outcomes, which has in turn contributed to KOTC receiving excellence awards in the field of maritime training.

A photo from one of the training courses held by the Coast Guard.

- **Partnership with the General Department of Coast Guard reinforces maritime training and knowledge exchange**
- **International academic partnerships aligned with the highest standards of maritime qualification**

The Company is preparing to send a new batch of Kuwaiti students to study maritime disciplines. Could you tell us more about this group and the universities or colleges they will attend?

The Company continues to implement its overseas maritime scholarship program with the aim of developing national personnel specializing in navigation and marine engineering. The program forms part of the Company's plan to educate and qualify Kuwaiti professionals who can contribute to meeting its strategic workforce requirements and advancing its Kuwaitization objectives. Accordingly, each new batch is determined based on the Company's future needs and operational requirements.

Students are sent to study at a number of specialized maritime institutions in the United Kingdom, including Blackpool and the Fylde College in Fleetwood, Solent University in Southampton, and Glasgow City College in Scotland.

These institutions offer programs that combine theoretical education with practical training, providing students with the academic and professional qualifications they need to pursue careers in the maritime sector after graduation.

What is the process for selecting scholarship students, and how do you monitor their academic and training progress throughout their studies?

Students are selected according to specific criteria designed to identify suitable candidates for maritime disciplines. Applicants must be Kuwaiti nationals, recent graduates of the science stream, and have achieved a minimum grade of 85%. They must also pass an English language test and a personal interview.

Throughout their studies, a dedicated department responsible for scholarship students maintains regular communication with the students and maritime

colleges, monitors their academic and training performance, and addresses any challenges they may encounter. This helps ensure that the program progresses in line with its established objectives.

How many students are sent in each batch, and what criteria does the Company use to determine the number of students for each scholarship intake?

The number of students accepted each year is determined through a careful assessment of the Company's future requirements for maritime personnel, its workforce replacement plans, and the capacity of maritime colleges. The Company aims to send 20 students each year, with the goal of maintaining a balance between the number of scholarship students and the quality of their education. This approach ensures a steady supply of qualified maritime professionals whose capabilities are aligned with the Company's future operational needs.

Working aboard ships did not attract many national professionals in the past, but we are now seeing growing interest among young Kuwaitis in this field. What factors have contributed to this change?

The maritime sector has witnessed a noticeable increase in interest among young Kuwaitis, driven by greater awareness of the importance of this field and the career opportunities it offers. Specialized scholarship programs, globally recognized training and qualifications, and the clear career path available to students have also played an important role in making maritime disciplines more attractive and encouraging more young Kuwaitis to pursue them.

- **The Arab Academy for Science, Technology and Maritime Transport is a strategic partner in training and qualifying maritime officers and engineers**
- **Overseas scholarship programs are opening new opportunities for young Kuwaitis in the maritime transport sector**

We have seen cooperation between KOTC and KOC in sponsoring maritime students for overseas studies. What are the key features of this cooperation? How many students have recently been included in the program, and when are they expected to graduate?

This cooperation was established to benefit from KOTC's experience in managing maritime scholarship programs and developing specialized personnel. A Memorandum of Understanding was signed with KOC under which KOTC oversees the sponsorship of maritime students and follows up on their academic and practical training throughout the various stages of their preparation.

To date, 70 students have been sent on behalf of KOC, 30 of whom have graduated so far. We continue to support the remaining students throughout their scholarship journey. Under this cooperation, the program aims to send a total of 150 students, with the number expected to increase in the coming years.

This collaboration reflects the K-Companies' broader approach of integrating efforts and leveraging specialized expertise to develop national talent capable of meeting the sector's needs.

The Company has a longstanding cooperation with the Arab Academy for Science, Technology and Maritime Transport in Egypt. What is the nature of this cooperation, and what have been its key outcomes?

The cooperation between the Company and the Arab Academy for Science, Technology and Maritime Transport covers the implementation of specialized academic and training programs, as well as the preparation of joint studies, and cooperates under a Memorandum of Understanding regulating the areas of training and occupational development of the Company's maritime officers and engineers of various nationalities. In addition, the Company recruits a number of Academy graduates who have completed their studies at their own expense to work aboard its vessels. This helps strengthen the Company's fleet with qualified maritime professionals.

This cooperation has contributed to developing maritime personnel with the practical knowledge and experience needed to work in the maritime sector, while further enhancing their technical and leadership capabilities in line with the requirements of the profession.

Awareness Lecture on the Supplier and Contractor Performance Evaluation Process

Group photo

The Commercial Group organized an awareness lecture on the supplier and contractor performance evaluation process and the related procedures through the Unified Commercial Platform of KPC and its subsidiaries. The lecture was held on Monday, June 15, 2026, at the auditorium of the Company's Head Office.

At the beginning of the lecture, Senior Qualification Analyst at the Commercial Group, Eng. Eman Al-Harbi, welcomed the attendees and explained that the lecture aimed to familiarize employees with the supplier and contractor performance evaluation process through the Unified Commercial

Platform. She also highlighted the latest updates to the evaluation process and addressed the various questions and inquiries related to the subject.

Functional Procedures Specialist at KNPC, Ms. Alaa Al-Rifai, then provided employees with a detailed overview of how to complete the procedures related to supplier and contractor performance evaluations, reviewing the various steps and requirements involved in the process.

The lecture concluded with Ms. Alaa Al-Rifai answering questions and addressing inquiries from the attendees.

Awareness Lecture Highlights the Role of Communication Skills in Occupational Development

Engineer Abdullah Al-Sarraf

In the scope of its efforts to develop employees' personal and occupational skills, the HSE Group, in collaboration with the HR and Career Development Group, organized an awareness lecture entitled "Communication Skills". The lecture was delivered by the Certified Public Speaking Trainer and Senior Drilling and Workover Engineer at KOC, Eng. Abdullah Al-Sarraf, on Tuesday, July 7, 2026, at the auditorium of the Company's Head Office.

During the lecture, Eng. Al-Sarraf explored the scientific and practical foundations of effective public speaking, emphasizing the importance of developing presentation and speaking skills through continuous practice and effective training. He highlighted these skills as essential tools that contribute directly to career development and occupational excellence within the workplace.

The lecture also focused on the key elements that should be considered before delivering any presentation or speech. These include thorough content preparation, structuring ideas in a logical sequence, and understanding the target audience, as well as more advanced techniques such as using body language, maintaining voice tone, and engaging positively with the audience to ensure that the message is conveyed clearly and its objectives are achieved.

In conclusion, the speaker emphasized that effective communication skills are a fundamental pillar of the modern workplace. They play a vital role in strengthening collaboration among teams, enhancing organizational performance, and supporting employees' career and leadership development.

Projects and Marine Agency Group Organizes Environmental Sustainability Exhibition and Lecture

Scenes from the lecture

In the presence of the DCEO of Fleet Operations, Captain Yousef Yacoub Al-Sager, the Projects and Marine Agency Group, represented by the Facility Management Team, organized an Environmental Sustainability Exhibition on Wednesday and Thursday, July 8–9, 2026.

The event brought together several K-Companies, the Ministry of Electricity, Water, and Renewable Energy, alongside a group of companies specialized in providing the latest innovative solutions and technologies for optimizing energy and water consumption and enhancing building efficiency. These efforts contribute to creating a more sustainable future for generations to come.

As part of the second day's activities, a lecture entitled "Sustainability" was held. During the lecture, the Team Leader of Facility Management, Eng. Sarah Al-Hadhood, emphasized that sustainability is a way of life and a set of daily practices that should be embraced, given their significant role in supporting sustainable development and raising environmental

awareness.

The lecture was also delivered by Eng. Abdulaziz Al-Munaifi and Eng. Ghalia Al-Misbah from the Renewable Energy Department at the Ministry of Electricity, Water, and Renewable Energy. They highlighted the Ministry's key renewable energy projects and the major challenges facing the sector, while also outlining the Ministry's strategy in this field. They further addressed the concepts of energy efficiency and energy conservation, explaining the distinction between the two and highlighting practical ways to apply both in everyday practices.

The lecture also featured an interactive knowledge quiz, which generated enthusiastic participation from attendees, followed by the presentation of prizes to the winners. At the end of the event, Captain yousef Al-Sager honored representatives of the Ministry of Electricity, Water, and Renewable Energy in recognition of their participation and valuable contribution to the success of the event.

KOTC Organizes Blood Donation Campaign to Support the National Blood Supply

Group photo

Based on its national role and commitment to corporate social responsibility, KOTC, through the HSE Group, organized a blood donation campaign in cooperation with the PR and Administration Services Group and the Central Blood Bank. The campaign was held on Wednesday, June 3, 2026, at the Company's Head Office.

The campaign aimed to support the national blood supply while encouraging a culture of humanitarian service among employees. Moreover, it sought to raise awareness of the importance of blood donation and its vital health and humanitarian benefits.

The campaign saw strong participation from KOTC employees, who came forward to donate blood in support of patients and those in need. Their participation helped reinforce awareness of the value of blood donation and fostered a stronger sense of giving and social responsibility among employees.

The campaign was marked by a positive and collaborative spirit, reflecting the Company's commitment to promoting the values of solidarity and community support, as well as its role in supporting humanitarian and social initiatives.

Cybersecurity Drill to Test Security Procedures Across the Company's Fleet

Part of the training

The HSE Group conducted a cybersecurity drill on Wednesday, June 17, 2026, to test the implementation of cybersecurity procedures across the Company's fleet. The drill was carried out in collaboration with the IT Group and the Fleet Engineering and Fleet Operations Groups.

Eng. Abdulaziz Al-Enezi, Team Leader of QHSE, explained that the exercise was designed to strengthen operational readiness, enhance preparedness for potential cyber threats, and assess the effectiveness of established procedures for protecting systems and information.

Al-Enezi noted that the drill scenario involved sending a simulated phishing email to the captain of the tanker Shegardiah, containing a malicious attachment designed to replicate a cyberattack and test the speed of response and level of coordination among the

concerned teams in handling such incidents after the captain opened the email.

He added that the IT Group responded to the simulated incident in accordance with established procedures and within a very short timeframe. The virtual threat was promptly detected and contained, while its potential impact was effectively addressed. This contributed to safeguarding information and ensuring the continuity of communications on board the tanker.

Al-Enezi expressed his appreciation to all the groups that participated in the drill. He also commended the IT Group for its rapid response and effective handling of the simulated cyberattack, highlighting the high level of competence and professionalism demonstrated in containing the incident and maintaining the security of information and communications.

KOTC Conducts Emergency Drill to Enhance Employee Readiness

In an effort to enhance emergency preparedness and raise its employees' ability to respond effectively to emergencies, KOTC, represented by the HSE Group, conducted an emergency drill at its Head Office on Thursday, August 6, 2026. The drill was designed to familiarize employees with the appropriate response procedures upon hearing civil defense alarm sirens, including moving away from windows and glass areas and proceeding to designated safe areas.

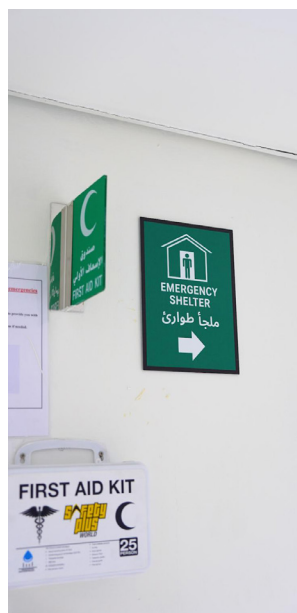

This comes as part of KOTC's continued efforts to promote awareness of health and safety procedures, strengthen the effectiveness of its emergency plans, and ensure that employees are fully prepared to respond promptly and effectively while maintaining their safety and ensuring an orderly response to any situation that may require them to remain inside the building.

“Back-to-School” Exhibition... School Preparations in a Family Atmosphere

Scenes from the exhibition

The PR and Administration Services Group, represented by the PR and Media Team, organized a “Back-to-School” Exhibition on Tuesday and Wednesday, August 25–26, 2026, in the main lobby of the Company’s Head Office. The exhibition brought together a distinguished selection of companies and brands offering a wide range of school essentials, along with products and services from food companies and health clubs. This provided employees and their children with an integrated experience that combined shopping and taking advantage of

special offers.

The event also featured a range of entertainment activities for employees and their children, creating a family atmosphere filled with fun and interaction.

The initiative reflects the PR and Administration Services Group's commitment to organizing meaningful events that foster internal engagement, support the well-being of employees and their families, and provide them with a distinctive experience as they prepare for the new school year.

KOTC International Relations:

In today's rapidly evolving global energy landscape, international relations have become a strategic function that supports business sustainability, strengthens institutional partnerships, and enhances an organization's global presence. At Kuwait Oil Tanker Company (KOTC), this vital role is carried out by the International Relations Section within the Governmental, Parliamentary and International Relations Team of the Public Relations and Administrative Services Group.

The International Relations division serves as a key link between KOTC and various international, regional, and government stakeholders. It oversees and coordinates all international affairs communications received through Kuwait Petroleum Corporation (KPC) and disseminates them to the relevant KOTC groups and departments. These communications often relate to business relations, commercial exchanges, strategic projects, international events, and cooperation initiatives that contribute to the company's long-term objectives.

Given the KOTC role as a leading provider of maritime transportation services for the energy sector, maintaining strong international relationships is essential. The company operates within a highly interconnected global environment where collaboration with governments, international organizations, diplomatic missions, and industry partners is increasingly important. Effective international engagement not only supports operational excellence but also strengthens Kuwait's presence within the global energy and maritime sectors.

Key Responsibilities of the International Relations Division

The International Relations Division is responsible for a wide range of activities that support KOTC's international engagement efforts, including:

- Representing KOTC at international forums, conferences, and events in coordination with relevant authorities, including activities organized through the Ministry of Foreign Affairs and other governmental entities. This includes coordinating and nominating KOTC representatives in response to invitations received through the Ministry of Foreign Affairs to participate in international conferences, diplomatic forums, and political consultation meetings aimed at strengthening Kuwait's international relations and promoting cooperation with foreign governments, international organizations, and strategic partners.
- Managing and coordinating international correspondence between KOTC and key stakeholders such as Kuwait Petroleum Corporation (KPC), the Ministry of Oil, government authorities, embassies, and international organizations.
- Supervising and coordinating responses to international inquiries received from KPC on behalf of KOTC concerning international relations matters.
- Preparing detailed reports, briefing notes, and analytical summaries related to international relations issues and developments.

- Establishing and maintaining professional relationships with foreign embassies, consulates, diplomatic missions, and international organizations to support KOTC's strategic interests and foster future cooperation opportunities. Examples of this role include organizing and coordinating meetings between the Company's senior management and ambassadors or heads of diplomatic missions to explore areas of cooperation related to the energy and maritime transportation sectors. The section also follows up on official correspondence and invitations received through the Ministry of Foreign Affairs regarding initiatives, events, and programs aimed at strengthening the State of Kuwait's international relations. In addition, it coordinates the participation of Company representatives in international conferences, forums, and political and economic consultation meetings related to the oil and energy sectors, thereby enhancing KOTC's international presence and expanding its professional network at both regional and global levels.

Managing International Affairs Communications

The International Relations Section follows a structured process to ensure timely and accurate handling of international affairs matters. Upon receiving an international inquiry or request through KPC, the division coordinates with the relevant KOTC groups and departments to gather the required information. The collected data is then reviewed, consolidated, and aligned with corporate policies before preparing official responses, reports, or briefing materials. This process ensures that all communications are accurate, consistent, and submitted through the appropriate channels within the required timelines.

Supporting KOTC's Global Presence

Beyond managing correspondence and official communications, the International Relations division plays an important role in enhancing KOTC's international profile. The division helps promote the company's achievements, strengthens strategic partnerships, and facilitates the exchange of knowledge and best practices with international counterparts.

A Strategic Function for a Global Industry

International relations are no longer viewed as a purely administrative function; it has evolved into a strategic business enabler. For KOTC and the wider oil and energy sector, effective international engagement contributes to stronger partnerships, improved collaboration, enhanced knowledge sharing, and greater alignment with global developments.

Through its dedicated efforts, the International Relations Section continues to build bridges of communication and cooperation with stakeholders around the world, supporting KOTC's mission, advancing Kuwait's energy interests, and reinforcing the company's position as a leading maritime transportation organization in the global energy industry.
